

Facility Overview

Glasgow, Scotland

Facility Scope & Industries Served

Curtiss-Wright's Glasgow, Scotland facility supports application requirements such as corrosion and erosion protection to extend component life across aerospace, power generation, defence, oil and gas, and general industrial applications.

Aerospace
Defence

Power Generation
General Industrial

Oil & Gas

Facility Capabilities & Services

- Chemical & Blast Strip
- Dress & Blend
- Sacrificial Coatings
- Dry Film Lubricants
- Bonding
- Masking
- Laboratory Analysis & Services
- Glass Bead Burnish
- Chrome Free Coatings
- Diffusion Coatings
- Superpolish
- NDT (FPI)
- Masking

Customer Approvals & Specifications

AS 9100	ISO 9001:2015
NADCAP Coatings	NADCAP Chemical-
Rolls Royce Subma-	Processing
rines	Rolls Royce Civil &-
Siemens Canada	Defence Aerospace

E/M Coating Applications

Steam/Gas Turbine Components

Turbine Blades, Compressor Spacers, Compressor Discs, Stator Vanes Shafts, Turbine Discs, Nozzle Guide Vanes, Compressor Casings, Compressor Rotor, Nuts & Covers, Seals & Carriers

Aerospace Components

Compressor Stator Vanes, Housings, Tubes, Seals, Bearings, General Hardware
