

Facility Overview

Montargis, France

Facility Scope & Industries Served

Curtiss-Wright's Montargis, France facility supports application requirements such as fatigue enhancement, straightening, stress corrosion cracking mitigation, fretting resistance, roughness control, polishing, superfinishing, and pitting contact fatigue improvement through advanced shot peening and finishing solutions across aerospace and industrial applications.

Aerospace
Helicopters
Automotive

Bizjet
Medical
Off-Highway Vehicles

Airfighters
General Industry
Energy

Facility Capabilities & Services

- Shot Peening
- Dry & Wet Treatment
- Peenforming
- Vibrofinishing Machines
- Superfinishing
- Manual and Robotic Jobs
- Grit Blasting
- Automatic, Robotic & Manual Cabinets
- Fieldjobs in France and Abroad
- Vibrofinishing

Customer Approvals & Specifications

ISO 9100	Nadcap SE
EN9100	OEM of Aircraft-
OEM of Helicopter-	Approvals
Approvals	

Shot Peening Applications

Aircraft and Rotorcraft Components

Engine Rotating Parts, Propellers and Rotors, Wings, Fuselage, Landing Gear, Blades, Structures (spars and struts), Transmission Gears: All designs

Auto Power Train & Auto Engine Components

Auto Power Train: Gears: All designs, Shafts

Auto Engine: Connecting Rods, Springs, Crankshafts

Medical

Hip Prosthesis

On-Site Shot Peening (Manual & Robotic)

Gas or Steam Turbines, Hydro Water Wheels
